

From The Directors Chair

Mike Leeuwen & Jason Syme

It looks like summer has eventually hit us and hopefully the warm days are here to stay.

Along with a few other projects we have been tackling, we would like to welcome two additional schools to our fold. These are Monument Primary School and Laerskool Millenium, both of them in Krugersdorp.

We are well suited to assist schools as we are a certified 'Microsoft Authorised Education Reseller'.

As you are aware it has been a while since our last newsletter went out: we thought we would like to congratulate Floors Direct with their newest addition to their growing lists of stores. Congratulations once again for your new Illovo Store in Sandton that we assisted in rolling out the IT infrastructure.

A word from the IT crowd

So what's new in Office 2010?

One can imagine that Microsoft has been rather busy this year. First of all the launch of Windows 7 earlier on in the year and now the much anticipated Office 2010 launch.

For all you socialites out there, you will be pleased to know that One Note links directly to social sites such as Facebook, Windows Live, LinkedIn and MySpace. It brings in simple things such as wall posts, photos etc. to liven up your email and to get a better idea of who you are communicating with. People that have been using the product Xobni would be familiar with these features.

Word has an automatic photo editor built in now. This will allow you to edit photographs on the fly within your documents. It will also allow you to import pictures direct from web sites as well. In addition more formatting options have been added which include 3D effects.

Excel has got some new fancy graphing added as well.

One of the greatest features added is the ability for you to change your menus the way you would like them to be.

Outlook 2010 has been changed quite radically to look and feel like the rest of the office suite. This includes the 'Ribbon' type menu options.

In closing there has not been a huge leap in technology from 2007. If you have been using the 2007 suite then you will be able to navigate your way around with ease.

New Staff

Since the last newsletter went out, we have had a few people join us.

Leaticia joined us towards the end of last year. She took up the position of Service Desk Operator. She has a big wooden stick to knock the technicians on the knuckles if they do not log all the repairs in.

Pieter joined us recently as a Field Technician. He joins us with a wealth of knowledge built up over the years in IT. We would like to welcome him to our stable

We have our own bunch of guys we keep in our cupboard. We would like to welcome and introduce you to the Base on Line team; Kyle, Brendan and Andrew. While Andrew is no stranger to many of our clients, the team specialises in PHP development as well as a few other odds and ends that are thrown at them.

Gert joined us a Web Developer. He has been with us for a couple of months and has already churned out a few impressive web sites.

Alan Calaugn joined us just over a month ago. He is based on site at Walter Becker as an Onsite Technician. We would like to welcome him to the ranks.
